## INTRODUCTION.

### I.

The Census of 1880-81, the second since the passing of the British North America Act, has been made under authority of the "Census Act" assented to on the 15th May, 1879, (42 Victoria, cap. XXI.)

There will be an introduction and an index to each volume of this Report. The information regarding Population and Property is a statement of facts existing on the fourth day of April, 1881. The information relating to the Census year itself, is for the twelve months dating from the 4th April, 1880.

The system adopted for the enumeration of the population is that of the population *de jure*.

### II.

In the absence of a permanent staff available for Census purposes, such for instance, as that which in England forms part of the Registrar General's Department, it was necessary to organise in every detail a special staff, and to adopt a peculiar mode of instruction.

Several months previous to the time fixed for beginning the enumeration, fourteen Census Officers were called to the Department of Agriculture to receive instruction, which in turn they were to communicate to the Commissioners and Enumerators of the various Census divisions.

The Census officers for 1881, were Messrs. Richard Hunt, for Prince Edward Island; George Johnson, for Nova Scotia; T. B. Hanington, for New Brunswick; Elzéar Gérin, J. A. Charlebois, C. A. Bailey and L. O. Taillon, for Quebec; Josiah Blackburn, William Canniff, John Beatty and J. G. Hawkins, for Ontario; William Hespeler, for Manitoba; J. W. McKay, for British Columbia; and Thomas Spence, for the Territories. Mr. J. G. G. Layton, who had been engaged in the Census of 1871, again occupies the post of Director of the work of compiling.

The enumerating officers were divided into two categories: the District Commissioners, to the number of 205; and the Enumerators, to the number of 3,183. All underwent, before entering on the work, a course of oral instruction, the Commissioners being instructed by the Chief Officers, and the Enumerators by the Commissioners. Each was furnished, besides, with a manual of instructions and a model schedule, explaining the manner in which each entry was to be made in the Census Schedule.

# RECENSEMENT DE 1880-81.

## INTRODUCTION.

### I.

Le Recensement de 1880-81, le deuxième entrepris depuis la passation de l'Acte de l'Amérique Britannique du Nord, a été fait par autorité de l' " ACTE DU RECENSEMENT," sanctionné le 15 mai 1879, (42 Victoria, chapitre xxi.)

Chaque volume de ce rapport aura son introduction, comme aussi ses index. Les renseignements relatifs à la population et à la propriété, sont l'état des faits tels qu'existant au jour du 4 avril 1881. Les renseignements qui s'appliquent à l'année dernière écoulée, datent du 4 avril, comptant douze mois en arrière.

Le système adopté dans le dénombrement de la population, est celui de la *population de droit*.

### II.

En l'absence d'un personnel permanent, disponible pour l'exécution d'un recensement, comme est, par exemple, celui qui, en Angleterre, appartient au Bureau du Régistrateur Général, il a fallu organiser, de toutes pièces, un bureau spécial et adopter un genre particulier d'instruction.

Plusieurs mois à l'avance du temps fixé pour le commencement du dénombrement, quatorze Officiers de recensement furent mandés au Département de l'Agriculture, pour là, recevoir les instructions qu'à leur tour ils avaient à transmettre aux Commissaires et aux Enumérateurs des diverses circonscriptions de recensement.

Ces Officiers de recensement, en 1881, ont été MM. Richard Hunt, pour l'Île du Prince-Edouard; George Johnson, pour la Nouvelle-Ecosse; T. B. Hannington, pour le Nouveau-Brunswick; Elzéar Gérin, J. A. Charlebois, C. A. Bailey et L. O. Taillon, pour Québec; Josiah Blackburn, Wm. Canniff, John Beatty et J. G. Hawkins, pour Ontario; Wm. Hespeler, pour Manitoba, J. W. McKay, pour la Colombie-Britannique, et Thos. Spence, pour les Territoires.

M. J. G. G. Layton, qui avait pris part aux travaux du recensement de 1871, comme officier et comme chef compilateur, a encore, cette fois, occupé la charge de directeur de la compilation.

Les officiers chargés du dénombrement se partageaient en deux catégories : les Commissaires de districts, au nombre de 205, et les Enumérateurs, au nombre de 3,183; tous ont subi, avant leur entrée en besogne, un cours d'instruction orale; les Commissaires, de la part des Officiers en chef, les Enumérateurs, de la part des Commissaires; chacun d'eux, en outre, était muni d'un Manuel d'instructions et d'un *Cahier-modèle*, expliquant la manière dont chaque entrée devait être faite dans les cahiers du dénombrement.

The enumeration schedules or tables were eight in number, disposed in the following order and method :—

Schedule 1.—*Nominal Return of the Living*, containing 20 columns for the insertion of information relating to the following subjects: Residences, names, sexes, ages, births, birth-places, religions, nationalities, professions, married or widowed, instruction, infirmities.

Schedule 2.—*Nominal Return of the Deaths*, within last twelve months, containing 11 columns for the insertion of names, sexes, ages, births for the year, religions, birth-places, professions, married or widowed, months and causes of the death.

Schedule 3.—*Real Estate, Public Institutions and Industrial Establishments*, containing 19 columns applying to Real Estate as a whole, to the nature of the institutions, the number of inmates, the nature of the Industrial Establishments, the names of the proprietors, the capital invested, the number of people employed, the aggregate amount of yearly wages, aggregate value of raw material; the articles manufactured and their value.

Schedule 4.—*Cultivated Lands, Field Products, Plants, Fruits and other Products*, containing 31 columns all relating to agriculture.

Schedule 5.—*Live Stock, Animal Products and Furs*, containing 20 columns, applying to the different subjects indicated in the title.

Schedule 6.—*Products of the Forest*, containing 20 columns relating to Forest industry.

Schedule 7.—*Shipping and Fisheries*, containing 31 columns, relating to the different kinds of vessels, their tonnage, and the quantities of the different kinds of fish caught.

Schedule 8.—*Mineral Products*, containing 20 columns, relating to the quantities of minerals extracted and other raw material of the same kind.

These Census Schedules were filled up by the Enumerators themselves, going from house to house, each within the limits of the division assigned him.

### III.

Canada, as may be seen by the Tables in this volume, was divided for Census purposes into 192 districts and 2,139 sub-districts. A certain number of sub-districts, on account of territorial extent, difficulties of travel, or comparative density of population, were divided, solely for the distribution of the work among the Enumerators, into two or several divisions, as the case might be.

Generally speaking, the Census Districts and Sub-districts correspond exactly with the Electoral divisions, as they existed in 1881, and with parish, township and other recognized sub-divisions.

Table 5 of this volume, compared with tables preceding it, shews the relation which exists between the Census districts and the Electoral divisions as determined by Act of 1872.

Les cahiers ou tableaux d'énumération étaient au nombre de huit, disposés dans l'ordre et dans la manière suivante :—

Tableau No. 1.—*Dénombrement des vivants*, contenant 20 colonnes destinées à l'insertion des renseignements ayant trait aux sujets qui suivent : demeures, noms, sexes, âges, naissances, lieux de naissance, religions, nationalités, professions, état de mariage, état d'instruction, infirmités.

Tableau No. 2.—*Dénombrement des morts des derniers douze mois*, contenant 11 colonnes pour l'insertion des noms, sexes, âges, naissances de l'année, religions, lieux de naissance, professions, état de mariage, mois et causes de la mort.

Tableau No. 3.—*Propriétés foncières, institutions publiques et établissements industriels*, contenant 19 colonnes s'appliquant à l'ensemble des propriétés foncières, au genre des institutions, au nombre des personnes internées, au genre des établissements industriels, aux noms des propriétaires, au capital employé, au nombre des employés, au montant des gages, à la matière première, aux articles manufacturés et à leur valeur.

Tableau No. 4.—*Terres occupées, produits des champs, plantes, fruits et autres produits*, contenant 31 colonnes s'appliquant aux renseignements agricoles.

Tableau No. 5.—*Animaux vivants, produits animaux, étoffes de ménage et fourrures*, contenant 20 colonnes, s'appliquant aux divers sujets indiqués dans le titre.

Tableau No. 6.—*Produits des forêts*, contenant 20 colonnes s'appliquant à l'industrie forestière.

Tableau No. 7.—*Marine et Pêcheries*, contenant 31 colonnes s'appliquant aux diverses espèces de navires, à leur tonnage et aux quantités prises de divers poissons,

Tableau No. 8.—*Produits des mines*, contenant 20 colonnes, s'appliquant aux quantités extraites des divers minéraux et autres matières du genre.

Ces cahiers de recensement ont été remplis par les Enumérateurs eux-mêmes allant de maison en maison, chacun dans les limites de la circonscription à lui assignée.

### III.

Le Canada a été, pour les fins du recensement, comme on peut le voir dans les tableaux de ce volume, partagé en 192 districts et 2,139 sous-districts de recensement. Un certain nombre de sous-districts, pour cause d'étendue territoriale, de difficultés de voyage ou de densité comparative de population, ont été partagés, mais seulement pour la distribution de l'ouvrage entre les Enumérateurs, en deux, ou plusieurs divisions, selon le cas.

En règle générale, les districts et sous-districts de recensement correspondent exactement avec les districts électoraux, tels qu'existant en 1881, et avec les paroisses, cantons et autres sub-divisions reconnues.

Le tableau V de ce volume, comparé aux tableaux qui le précèdent, fait voir le rapport qui existe entre les districts de recensement et les districts électoraux établis par l'acte de 1872.

## IV.

The only titles at the head of the columns of Table I requiring, perhaps, some explanations, are those referring to temporary dwellings under the titles of *vessels* and *shanties*. The vessels referred to are only those, which on the 4th April 1881 were inhabited by families; the enumeration of the Merchant Marine of the country belongs to another part of this report. The word *shanty* is used here in its local acceptation, to designate dwellings hurriedly put up, or the moveable lodges of nomadic populations.

The other five tables of this volume require no remark. An Index and an Analytical Table of Contents end this volume. The Indexes to the districts, of which one follows the numerical and the other the alphabetical order, indicate the table and pages containing the information relating to each district.

The Alphabetical Index of the sub-districts has, for reference, the number of the district to which the sub-district belongs, and the special letter of the sub-district, whence it follows, that, on referring to the number indicated in the numerical Index of the districts, the desired information relating to any particular sub-district can easily be found in its proper place, dispensing with the necessity of repeating the reference in the other volumes, as it applies to all the district Indices.

No explanation is necessary with regard to the Analytical Table of Contents.

No pains have been spared to obtain the information necessary for the execution of so important a work as this, which is in no respect inferior as regards exactitude to works of a similar kind published in any other country. It cannot be effected that so extensive a work should be absolutely perfect. That would be to ask what is simply impossible. All that can be required and must be obtained is the relative exactitude which has been secured in the present Census?

## V.

It has been almost impossible to make an enumeration, properly so called, of the Indian population over a great extent of the unorganized territory of the Confederation; consequently the rate of the aboriginal population of the sub-districts thus situated has been settled by estimate, these districts being: The northern part of sub-district C, of District 187 British Columbia; certain sections of the District in the interior of the same Province; all the sub-districts of District 192 (Territories) with the exception of those included in the Indian Treaties Nos. 1, 2, 3, 4, 5, 6 and 7, the enumeration of these being made according to the indemnity per head paid by the Department of the Interior; and also with the exception of the principal portion of the Indian population of Eastern Rupert's Land, which has been regularly enumerated.

The estimates of the Indian population of the sub-districts, not susceptible of enumeration, are the same as those published in the fourth volume of the Statistics and Census of 1871, whose approximate correctness is fully proved by a comparison of them with the portion regularly enumerated in 1881. In round numbers, of the total aboriginal population, amounting to 108,547 souls in the Census of 1881, the estimate just spoken of has been made in respect to 34,000.

## IV.

Les seules têtes de colonnes du Tableau I qui demandent peut-être quelques explications, sont celles qui réfèrent aux demeures temporaires, sous les titres de *Navires et Chantiers*. On n'entend ici parler que des navires qui, au 4 avril 1881, étaient habités par des ménages; l'énumération de la marine marchande du pays appartient à une autre partie de ce Rapport. Le mot *Chantier* est pris ici dans son acception locale, pour désigner des demeures élevées à la hâte, ou encore les loges mobiles des populations nomades.

Les cinq autres tableaux de ce volume n'exigent aucune remarque.

Des *Index* et une *Table analytique des matières* terminent ce volume. Les index des districts, dont l'un suit l'ordre numérique et l'autre l'ordre alphabétique, donnent l'indication du tableau et des pages où se trouvent consignés les renseignements se rapportant à chaque district.

L'index alphabétique des sous-districts a, comme indication, le numéro du district auquel le sous-district appartient et la lettre caractéristique du sous-district; d'où il résulte que,—en référant au numéro indiqué dans l'index par numéro d'ordre des districts,—il est facile de trouver l'endroit du volume où sont les renseignements cherchés pour un sous-district quelconque. Cet index des sous-districts n'aura pas besoin d'être répété dans les autres volumes, attendu qu'ils s'applique à tous les index des districts.

La table analytique des matières ne demande point d'explication.

On n'a rien épargné pour obtenir les renseignements dont on avait besoin pour l'exécution d'une œuvre aussi importante que celle-ci, laquelle pour l'exactitude, ne le cède en rien aux travaux de ce genre publiés dans les autres pays. On ne peut exiger qu'un ouvrage aussi considérable soit parfait: ce serait demander l'impossible. Tout ce qu'il y a lieu d'exiger et qu'il faut obtenir, c'est une exactitude relative qui a été atteinte dans le présent Recensement.

## V.

L'énumération proprement dite de la population sauvage, d'une grande étendue du territoire inorganisé de la Confédération, est chose à peu près impossible; conséquemment, le taux de la population aborigène des sous-districts ainsi situés a été établi par estimations, savoir: la partie nord du sous-district C du district 187 de la Colombie-Britannique, certaines sections des districts intérieurs de cette même province, tous les sous-districts du district 192 (Territoires), à l'exception de ceux qui sont compris dans les traités sauvages Nos. 1, 2, 3, 4, 5, 6 et 7, dont l'énumération a été faite d'après les comptes d'indemnité payés par le Département de l'Intérieur; à l'exception, encore, de la principale portion de la population sauvage des terres de Rupert-Est, qui a été énumérée régulièrement.

Les estimations faites de la population sauvage des sous-districts non susceptibles d'énumération, sont les mêmes que celles qui ont été inscrites dans l'Introduction du 4e volume des Statistiques et Recensement de 1871, dont l'exactitude approximative ressort complètement de leur comparaison avec les portions régulièrement énumérées en 1881. En chiffres ronds, sur la population totale aborigène, comptant 108,547 têtes dans le recensement de 1881, 34,000 ont été l'objet des estimations dont on vient de parler.
